

ASSIGNMENT-2

Python Programming

Assignment Date	1 st October 2022
Student Name	Ms.V.JINCY
Student Roll Number	960219106074

Question-1:

Build a python code, Assume u get temperature and humidity values(generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

Solution:

```
import random

i=1

while(i<=0):

    temp=random.randint(-88,58)

    hum=random.randint(1,10)

    hum=hum*10

    print(f"Temperature: {temp}\u00B0C")

    print(f"Humidity: {hum}%")

    if temp>37 and hum>50:

        print("High Temperature:ALARM ON")

    else:

        print("Low Temperature:ALARM OFF")

    i=i+1
```

```
